

Financial News--Stock Market Prices

MARKET OPENS LOW, ADVANCES

Great Vitality Shown by Some Issues in Street Tuesday.

By BROADMAN WALL.
New York, Sept. 23.—Stocks were irregular in Wall Street today but so many of them displayed exceptional strength as to give a general optimistic view to the situation. Chief among the leaders were, of course, the tobacco, but there was also much vitality displayed by the motor, petroleum, sugar and other stocks. Profit taking on a large scale made its appearance in the afternoon and cut down prices in a few issues, but the gains were in most cases almost entirely recovered. Cotton was strong again as was foreign exchange, particularly German marks, which advanced somewhat.

Decision of the United States Senate to investigate the steel strike put an entirely new face on the situation in the labor world. Even if President Wilson were inclined personally to give his aid to striking steel men the fact that the Senate was investigating the situation would make him hesitate.

The outlook, therefore, is for something like an armistice in the big fight. Judge Gary cannot renege from his position of refusing to consult with outsiders regarding the internal affairs of the steel corporation although he always has been and now is willing to talk with the employees. He will be compelled, however, to appear before a Senate committee and that would save the faces of everybody concerned.

The great war in Europe has disorganized all industry and it is to be regretted that an entirely new basis. Mere good treatment of the employees will no longer suffice. Labor takes the stand as if it were the partner in the war to save the world, so must it be partner in all interior in the future.

The fact that prohibition has lowered the entire mass of working people makes the situation much more acute. Silver master went to the highest record since the war.

The persistent selling of United States Rubber has been traced to insiders. What the reason is cannot be stated but the reason is several reasons. Railroad shares were more active.

CURB MARKET.
